Indicator Summary

Low Risk

Overall portfolio health is stable. Most indicators are within healthy ranges. No explicit buy or sell recommendations are provided.

ANNOTATIONS

1 Ticker selector: dropdown from user's portfolio holdings. Triggers GET /api/indicators/{ticker}.

2 8 indicator cards: P/E, Sharpe, Beta, RSI, Sortino, Altman Z-Score, CAPM, Dividend Yield. Each shows value and an interpretation label.

3 Colour coding: safe = healthy, caution = review, risk = concern. Applied independently per card.

4 RSI chart: 30-day trend. Threshold lines at 30 (oversold) and 70 (overbought). Summary panel shows overall risk rating with guardrail on explicit advice.

AI Portfolio Assistant

Ask questions about your portfolio - no explicit buy/sell advice provided

Assistant

Hello! Your portfolio is currently holding 4 positions. Your total value is R 72,762, up 2.1% this month. What would you like to know?

You

What is my highest risk holding?

Assistant

Based on your holdings, MTN has the highest Beta at 1.3, meaning it moves more than the broader market. Its RSI is also approaching 68, near the overbought threshold. You can review full indicators on the Analytics page.

How is my portfolio performing?

What is my highest risk holding?

Guardrails active - no explicit buy/sell advice

- ANNOTATIONS
- 1

Scrollable message history. AI messages left-aligned, user messages right-aligned.
- 2

Suggested prompt chips shown on load. Clicking one pre-fills the input field.
- 3

Send submits POST /api/ai/chat. Loading indicator shown while waiting for response.
- 4

Guardrails active: explicit buy/sell requests receive a disclaimer and redirect to the Analytics page.
- 5

AI has access to the user's portfolio context so responses are specific to their actual holdings.
